

# I am a Dino Knight

Congratulations, you have been chosen to join:

1. Draw yourself as a Dino Knight.
2. Write down what your talents are.
3. Choose and name your dinosaur.

# I am a Dino Knight

## **Albertosaurus** (*Al-bert-oh-sore-us*)

Smaller than the T-Rex, but no less fierce, the meat-eating Albertosaurus is Sir Neville Avingdon's preferred mount when he rides instead of flies.

## **Deinonychus** (*Die-non-i-cuss*)

This dinosaur is one of the many types of raptor and is used by Krilla and her army.

## **Ankylosaur** (*Ank-ee-lo-sore*)

The Ankylosaur is a low, solid animal covered in thick, spiky scales. The Ankylosaur has a deadly tail that can knock other dinosaurs sideways. Iyla's dinosaur is of this kind, and is called **Conker**.

140

## **Hypsilophodon** (*Hip-sill-oh-fo-don*)

This dinosaur walks on two legs and has scales. The Hypsilophodon is a herbivore and likes to eat Brecklan berries.

141

## **Nothronychus** (*Noth-ron-ee-chus*)

Torin's dino, called **Haringey**, stands on two legs and has feathers that look a bit like fur from a distance.

## **Ornithomimus** (*Orn-ith-oh-mim-us*)

A fast, agile dinosaur that can gallop on two legs and looks a bit like an overgrown bird. Galliard calls his animal **Avin**.

142

## **Parasaurolophus** (*Pair-a-sore-ol-oh-fuss*)

This dinosaur has a hollow horn atop its head that is used for making sounds. These are Lord Harding's preferred animals for pulling his carriage because he likes the horn-sounds they make when they announce his arrival.

## **Pterosaur** (*Tear-oh-sore*)

A winged creature, but not strictly a dinosaur. Sir Neville Avingdon was breeding an air force of these flying beasts.

143

# I am a Dino Knight

## **Styracosaurus** (*Sty-rah-co-sore-us*)

This dino has six spikes on its head.

This is Ellie's dino,  
called *Kayla*.

## **Tyrannosaurus Rex**

(*Tie-ran-oh-sore-us Rex*)

A large, fierce carnivore (meat-eater).

T-Rexes are known to roam wild in  
Panterra, and nobody believed they could  
be tamed.

## **Triceratops** (*Try-ser-a-tops*)

A lumbering herbivore (plant-eater) that  
has three horns on its head. My favourite  
Triceratops is called *Tribus*.

144

## **Utahraptor** (*You-tah-rap-tor*)

This dinosaur is a raptor. Raptors are very  
intelligent and hunt in packs. They are the  
choice of the Royal Guardians of Volcanica.
