

How to make: A Tissue Box Guitar

You Will Need:

- 1 empty tissue box
- 1 or 2 short pencils
- 3 or more elastic bands
- Stickers/paint/tissue paper or any other decorating materials (optional)

Instructions:

1. If you are going to decorate your guitar, do this first. You might want to paint the box or stick pictures all over it, it's up to you!
2. Carefully stretch the elastic bands around the length of the tissue box, make sure the elastic bands are not too loose, or so tight that they will snap.
3. Slip the pencil under the elastic bands and alongside the hole in the middle of the box. If the guitar sounds a bit rattley and out of tune, you can put another pencil opposite on the the other side of the hole to make a sharper sound.
4. If you are happy with the guitar, you can stick down the pencils in place. Happy music making!
